To the EIS,

- 1 [I oppose the Yucca Mountain Nuclear waste site proposal. It is an area with a fast growing population that would be in danger of any contamination. The state's largest dairy and aquifier is in the area.]
- 2 [All of the land is within treaty lands of the Western Shoshone Nations, ratified by Congress in 1863 and recently upheld by the UN. Yucca Mountain is in a very dry area, but flood to occur and this could cause extensive contaminationAlso the weather may change even more with global warming.]

1  
cont

Transporting the nuclear waste is also very risky without a safe way developed.

PLEASE do not approve this project.]

Sincerely,  
Thomas Matsuda
